

Summary of potential projects for FY22-23 WBIF supplemental funding request:

- **Anoka Conservation District:**
 - Requesting funds to install shoreline stabilization and restoration projects on at least 300 linear feet of shoreline, focused on LSC priority lakes including Linwood and Martin, resulting in 8 lbs/yr phosphorus reduction minimum. This work would help meet LSC Partnership goals for developed and developing areas (actions 20 and 21 in table 5-1) of 20 lakeshore stabilizations and restorations per year.
 - \$35,000 grant funds requested for technical / engineering support
 - \$100,000 grant funds requested for project implementation (\$13,500 match)
 - Total grant funds requested \$135,000

- **Carnelian – Marine - St. Croix Watershed District**
 - Requesting funds to complete five structural urban BMP projects, purchase equipment to implement targeted enhanced street sweeping in Scandia and Marine on St. Croix, purchase a no-till drill for use in Chisago and Washington Counties, fund ag technical assistance basin-wide, fund shoreline education and outreach in Chisago and Washington Counties, and conduct an internal load analysis on Goose Lake.
 - \$330,000 grant funds requested for Panorama/133rd Water Quality Improvement Project Big Carnelian Lake (\$90,000 match)
 - \$280,000 grant funds requested for Bliss Addition Stormwater Quality Improvement Project Big Marine Lake (\$28,000 match)
 - \$200,000 grant funds requested for Big Carnelian Lake Water Quality Improvement Projects (\$20,000 match)
 - \$200,000 grant funds requested for Spring Creek Stormwater Improvement Project (\$20,000 match)
 - \$420,000 grant funds requested for Big Marine Lake Water Quality Improvements Phase II (in conjunction with Scandia Street) 2 IESFs, 1 Bioretention Basin, 1 Wetland Restoration (\$42,000)
 - \$390,000 grant funds requested for Willow Brooke Stormwater Improvement Project (\$39,000)
 - \$375,000 grant funds requested to implement targeted enhanced street sweeping plans in Scandia and Marine on St. Croix
 - \$40,000 grant funds requested to purchase a no-till drill for use in Chisago and Washington Counties
 - \$150,000 grant funds requested for ag technician basin-wide
 - \$150,000 grant funds requested for shared educator North Washington and Chisago Chain of Lakes (\$5000 match)
 - \$84,500 grant funds requested for technical / engineering support for Willow Brooke stormwater improvement and Mill Stream restoration projects (\$10,000 match)
 - \$48,700 grant funds requested for Goose Lake internal load evaluation
 - Total grant funds requested \$2,668,200

- **Chisago Soil and Water Conservation District**
 - Requesting funds to implement numerous ag and urban structural and non-structural BMPs in the Goose Creek Watershed.
 - \$100,000 grant funds requested for ag structural BMPs (\$25,000 match)
 - \$20,000 grant funds requested for urban structural BMPs
 - \$30,000 grant funds requested for non-structural BMPs
 - \$80,000 grant funds requested for technical and engineering assistance
 - \$20,000 grant funds requested for program administration
 - Total grant funds requested \$50,000

- **Comfort Lake – Forest Lake Watershed District**
 - Requesting funds to implement a wetland restoration project on Bone Lake, a feedlot livestock waste management project on a tributary to the Sunrise River, and non-structural ag practices
 - \$71,000 grant funds requested for July Ave. feedlot livestock waste management (\$7100 match). The site drains to a tributary of the Sunrise River, which is a regionally significant river per Table 5-2.
 - \$395,000 grant funds requested for non-structural ag practices at Bone Lake (a priority area for soil health practices per implementation item #1 in table 5-1, part A) and July Ave sites (\$39,500 match).
 - \$1 million grant funds requested for Bone Lake wetland restoration (\$100,000 match). This area is a high priority wetland restoration per Figure 5-5.
 - \$180,000 grant funds requested for technical/engineering support (\$18,000 match)
 - Total grant funds requested \$1,646,000

- **Middle St. Croix Watershed Management Organization**
 - Requesting funds for Lake St. Croix Bluff stabilization and/or restoration of up to 10 bluffland properties directly draining to Lake St. Croix (Structural Urban BMP Implementation)
 - \$100,000 grant funds requested (\$30,000 match)
 - Total grant funds requested \$100,000

- **Isanti Soil and Water Conservation District**
 - Requesting grant funds to implement 100 acres of cover crops
 - \$18,000 grant funds requested for non-structural ag implementation
 - \$2000 grant funds requested for technical / engineering support (\$2000 match)
 - Total grant funds requested \$20,000

- **South Washington Watershed District**
 - Requesting grant funds to implement a ravine stabilization and bioretention project at St. Croix Bluffs Regional Park and stabilize multiple ravines on Trout Brook.
 - \$343,750 grant funds requested for St. Croix Bluffs. \$531,250 grant funds requested for Trout Brook. \$700,000 total. (\$175,000 match)
 - \$100,000 grant funds requested for technical/engineering support for Trout Brook ravine stabilization projects. (\$10,000 match)
 - Total grant funds requested \$800,000

Total possible grant funds requested: \$5,419,200
